

Engineering leader with **10+ years** shipping production systems across **fintech, travel tech, e-commerce, and applied AI** — for companies in Malaysia, the USA, Japan, and Bangladesh. I own architecture from data models to deployment, lead distributed teams to on-time delivery, and still write code every day.

## HIGHLIGHTS

**\$3.5M**

yearly revenue from OTA integrations —  
Booking.com, HomeAway, VRBO

**#1**

built ryans.com, storefront of BD's largest  
computer chain

**6 / 4**

companies across 4 countries, teams led  
remotely

## EXPERIENCE

### Technical Lead

Dec 2024 – Present

**Moby (moby.my)** · Financial services · Malaysia, remote

- Lead engineering across Moby's fintech suite — **MobyOmni** for business (POS, BNPL, invoicing, loans, loyalty, agentic AI) and **MobyOne** for retail (paylater, QR & bill pay, insurance).
- Own architecture from data models to deployment for **Shop Now, Pay Later** products — both conventional and Islamic financing.
- Mentor developers and set the bar for quality, security, and reliability across a Go / Node.js / PostgreSQL stack.

### Team Lead

Aug 2023 – Nov 2024

**Faible Inc** · Interactive storytelling platform · USA, remote

- Built an **AI storytelling engine** on ChatGPT and Gemini — context-aware, choice-driven stories where every reader decision branches the narrative in real time.
- Led the full stack — React front end, Django backend — and shipped MVPs on aggressive timelines.

### Team Lead

Aug 2020 – Sep 2023

**DreamOnline Ltd (dreamonline.co.jp)** · Japan, remote

- Delivered a portfolio of applications for Japanese clients — booking systems, online education platforms, and more.
- Built server-side rendered Next.js applications optimized for performance and SEO; managed AWS infrastructure and led distributed teams to consistent, on-time delivery.

### Senior Software Developer

Nov 2018 – Jul 2020

**Ryans Computers (ryans.com)** · Bangladesh

- Created **ryans.com** — the e-commerce platform for Bangladesh's largest computer retail chain, serving 20+ branches nationwide.
- Built the storefront in Laravel, wired real-time inventory sync over Node.js, and powered search across thousands of SKUs with Algolia; shipped cash-on-delivery and EMI payment flows.

### Senior Software Engineer

Mar 2016 – Oct 2018

**W3Engineers Ltd (left.io — now TravelAI)** · Bangladesh

- Integrated **Booking.com, HomeAway, and VRBO** supply APIs powering a portfolio of travel brands (RentByOwner.com and 15+ others) — driving **\$3.5M in yearly revenue**.
- Built high-throughput Node.js services with RabbitMQ and Redis to sync millions of property listings and rates.

### Full Stack Developer — Freelance

Jan 2013 – Feb 2016

**Upwork** · International clients

- Delivered web applications across multiple industries with top-rated client feedback.

## SKILLS

### LANGUAGES

Go, JavaScript / TypeScript, PHP, Python

### BACKEND

Node.js, Laravel, Django, REST & GraphQL APIs, RabbitMQ, Redis, PostgreSQL, MongoDB

### FRONTEND

React, Next.js (SSR / SEO), performance optimization

### AI / LLM

LLM integration & orchestration (OpenAI, Gemini), context management, agentic workflows

### INFRASTRUCTURE

AWS, Docker, CI/CD, system design, event-driven architecture

### LEADERSHIP

Distributed team leadership, mentoring, hiring, code review culture, technical direction

## EDUCATION

**BSc in Computer Science & Engineering** · Dhaka International University, Bangladesh

2008 – 2012
